How to Customize the Text Effect

Step 1

- Open the PSD file(s) in Adobe Photoshop.

- Double click the smart-object layer(s) marked in RED on the very top named "ADD TEXT HERE" and add your text or quote and click Save. Your normal text will automatically be converted to milk effect.

- You can move around the "vector liquid drops" to set them in line with your text. Or you can add your own liquid drops.

Step 1

- You can replace the background color using the "Color Fill" layer at the bottom of the layers. Or add your own background image.

- You can play around with layer effects such as options to change the color of the layers and background color until you are satisfied.

- Once you are done, export the scene and enjoy!
